EDUCATION

Delhi Technological University <i>Bachelor of Technology in Computer Science</i> CGPA: 7.13	Delhi, India 2022 – 2026
Titiksha Public School <i>12th - Percentage: 78.4%</i>	Delhi, India 2022
Titiksha Public School <i>10th - Percentage: 72.8%</i>	Delhi, India 2020

EXPERIENCE

Full Stack Web Development Intern <i>Global Next Consulting India Private Limited, Noida</i>	July – September 2025 Link
- Led a team of 4 engineers to architect, build, and deploy 3 production-grade full-stack applications using React, Node.js, Express, and MongoDB with end-to-end ownership. - Designed and implemented scalable RESTful APIs with secure authentication and role-based access control, reducing API response latency by 27% under concurrent load. - Built real-time, event-driven features using Socket.io and improved frontend performance using TypeScript and Tailwind CSS for cross-device optimization.	

PROJECTS

AI Powered Blogify <i>Next.js, Convex, Clerk, Gemini AI, ImageKit, Tailwind CSS, shadcn UI</i>	Live GitHub
- Built a full-stack AI blogging platform using Next.js App Router with real-time backend functions via Convex and secure authentication using Clerk. - Integrated Google Gemini AI for blog content generation and editing with modular AI workflows for different writing actions. - Designed a rich-text editor and post management system supporting draft/publish workflows, sorting, filtering, and user interactions. - Implemented image upload and optimization using ImageKit with transformations such as resizing and format optimization.	
VidStream <i>Node.js, Express.js, MongoDB, JWT, Multer, Cloudinary</i>	Live GitHub
- Built scalable RESTful APIs using Node.js and Express.js for user, video, and subscription management following MVC architecture. - Implemented secure authentication and authorization using JWT, bcrypt, cookies, and custom middleware. - Designed optimized MongoDB schemas with Mongoose and integrated media uploads using Multer and Cloudinary	
CryptoPulse <i>React.js, Tailwind CSS, Firebase, Redux Toolkit, Chart.js, CoinGecko API</i>	Live GitHub
- Developed a cryptocurrency dashboard using React.js to display real-time market data with interactive charts. - Managed global application state using Redux Toolkit following unidirectional data flow, action dispatching, and slice-based architecture. - Applied performance optimization techniques such as memoization, debouncing API calls, pagination, and efficient component re-rendering.	

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, TypeScript
Frontend: React.js, Redux, Next.js, Tailwind CSS
Backend & Databases: Node.js, Express.js, MongoDB, MySQL, Convex, Firebase, Git
Core: Data Structures, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- Solved over 500+ coding problems across various platforms including [LeetCode](#), [GFG](#), and Codeforces.
- Attained a rank of 1323 out of 30k on LeetCode, demonstrating consistent problem-solving and proficiency in data structures and algorithms.
