## Education

### Techno International Batanagar

B.Tech in Computer Science (CGPA: 8.81)

2021 - 2025

West Bengal, India

### Madhayamgram High School

Higher Secondary (79.6%)

2018 - 2020

West Bengal, India

### New Barackpore Colony Boys High School

Secondary (65.71%)

2017 - 2018

West Bengal, India

## Technical Skills

**Languages:** C++, Python, JavaScript, TypeScript, HTML/CSS

**Frameworks:** Next.js, React, Express, Flask, Tailwind CSS

**Databases:** MongoDB, PostgreSQL, Redis

**Tools:** Git, Docker, Grafana, Prometheus, Loki, RabbitMQ

**AI/ML:** LangChain

## Projects

**Medireon** | Next.js, Node.js, Express, MongoDB, Tailwind CSS, RabbitMQ, LangChain | Live

2024 - Ongoing

- A cloud-based Hospital Management System (HMS) empowering healthcare providers with **patient management, billing, EMR, telemedicine, analytics, and AI-driven support**.
- Implemented comprehensive monitoring with **Grafana, Prometheus, and Loki** for observability, reducing system **downtime by 40%** and **improving issue resolution time by 60%**.
- Developed **RabbitMQ-powered queues** for email notifications, appointment reminders, and support ticket processing, **handling over 5,000 daily messages with 99.9% reliability**.
- Built an **AI-powered support system** using **LangChain and Gemini**, enabling intelligent chatbots for **patient queries and automated assistance for hospital staff**.
- Designed and implemented a responsive front-end with **Next.js and Tailwind CSS**, **improving user experience scores by 35%** based on internal testing.

**Connect** | MongoDB, Express, React, Redux, Cloudinary | Live

2022 - Ongoing

- Built **Connect**, a social media platform enabling **user registration, post creation, commenting, following, and user search, with a strong focus on interactive community features**.
- Using **Cloudinary**, **Latency reduction by 30-60%**, **load time improve upto 25%**.
- Developed and integrated **JWT-based authentication and authorization** for secure, stateless session management.
- For **smooth, seamless and responsive experience**, we utilize **React Reusable Component** for rendering.
- Improve **the speed of the API**, we use **caching** with the help of **node cache** around **40%**.
- For **data storing**, we use **MongoDB** for **flexible schema**.

**NexZenith (Group)** | NextJs, Typescript, Shadcn/ui, Flask, Prisma, CockroachDB, Stripe, Razorpay

2023 - 2025

- It is an **AI based Software As A Service(SAAS) platform** which can help any type of user for their needs.
- User can **register with their G-mail** for **hustle free login** with the **Clerk authentication and authorization provider**.
- User can **ask something, generate image and Video** with our **fine tuned model** with our own dataset which made with help of **Python**.
- The overall **accuracy** of the model is **54.324%** also we are constantly work to increase it.
- For **type safety and help to debug** we use **Typescript**.
- For **smooth experience**, we utilize **shadcn/ui** for **rendering reusable Component**.
- Also We implemented **subscription based payment integration** with the help of **Razorpay for India** and **Stripe for international**.

## Achievements

- Secured 3rd in Prayas 2k24 inter-college project competition. ([Link](#))
